iCAN2020 Final Contest in Qingdao

2020.11.01

The 2020 International Final Contest of Innovation was held at Qingdao from October 29th to 30th. It was organized by iCAN International Association and Peking University, and supported by SIC·IEI, ZLHT, MEMS, ERA, FAULHABER, Micronit, BERLIN PARTNER, etc. This year marks the 10th anniversary of the iCAN International Competition, this international competition was held together with the graduate academic league championship finals, iCANX Talks: Rising Stars of Light, Science and Technology Awards Ceremony. Gathering nearly 300 people including internationally renowned professors and scholars, young innovators, scientific researchers, entrepreneurs and so on.

The International Finals have attracted 15 scientific and technological innovation productions from China, France, Japan, Thailand, Hong Kong, involving health monitoring, intelligent sensing, artificial intelligence, Driverless, science and technology, biomedical technology, etc. It showed cutting-edge scientific and technological inventions, innovative achievements and team spirit to the world with the iCAN spirit of "confidence, persistence and dream".

Due to the COVID-19, this competition adopts online and offline mixed competitions, embedded virtual live broadcast mode. This contest promoted and strengthened the combination of production, learning and research in the high-tech field, promoted the development of high-tech industry, and built an international exchange platform for high-tech innovation and entrepreneurship by practical actions.

This time, innovative youth from all over the world gathered in Qingdao with the dream of innovation, hoping to make innovative changes in people's lives through the collision of ideas in the competition. Professor

Alice Zhang, founder of iCAN and professor of Peking University, welcomed the global innovative youth and expressed her support for the original innovation.

The 2020 iCAN International Final obeys the competition rules of the iCAN Competition over the years. It takes the form of 8-minute team presentation and 5-minute judges' questioning and communication. It mainly focused on the four aspects of work elaboration, innovation, practicality and technology. The competition is fierce and the presentation forms are fully showing the 'confidence, persistence and dream' spirit.

After a day's fierce competition, the participants of the 2020 iCAN International Finals won two first prizes, four second prizes and nine third prizes. The details of the awards are as follows:

Number	Country/Region	Project Name	Prize
A01	China	Calmspoon Stabilizing Tableware	First Prize
A02	France	ASDLearn, the diagnostic assistance for early autism's detection	First Prize
A03	China	Small Window-Cleaning Robot With Obstacle-Crossing Function——Taichi Robot	Second Prize
A04	Japan	LuftWrite -Characteristic Recognition Pen	Second Prize
A05	Japan	Road Surface Condition Detection System	Second Prize
A06	China	Intelligent Coconut Processing Line	Second Prize
A07	China	Baby Heart Growth	Third Prize
A08	Thailand	3D stereographic endoscope with automated image analysis for cervical cancer early detection	Third Prize
A09	China	Barstation	Third Prize
A10	Japan	Alap (As Loud As Possible In Music)	Third Prize
A11	China	Ocean Current Driven Foldable Wing-Sail Propeller	Third Prize
A12	Thailand	Advanced Optical Endoscope for Cervical Cancer Screening	Third Prize
A13	Thailand	An E. coli screening machine in water via fluorescence detection	Third Prize
A14	Japan	Shaberu-Shaberu	Third Prize
A15	Thailand	A Self-driving Delivery Robot Aiding Social Distancing	Third Prize

Congratulations to them for their achievements in the 2020 Innovation International Competition. Thanks to all participants. At this difficult time, sincerely thank all the teams for their great support to iCAN.

ICAN2020
INTERNATIONAL CONTEST OF INNOVATION 2020
October 29-30, Qingdao, China

Looking forward to the offline meeting next year!
