

Electrical measurement

$$R, r_i \dots \text{constant} \quad e'' = \frac{r e'}{R + r_i}$$

Prof. William Thomson
(1824-1907, Sir Kelvin)
Glasgow University

Potentiometer (measurement of electromotive force with zero current)

First galvanometer by Sir Kelvin

Optical galvanometer (1)

Principle of optical galvanometer by Sir Kelvin

Optical galvanometer (2) (sensitivity $0.02 \mu A$)
